

Protecting Your Business Should Be Your First Line of Business

For a broad array of commercial industries, including manufacturing, warehousing, trucking/shipping, restaurants, and financial institutions the availability of cutting edge security protection and state-of-the-art alarm and video surveillance systems, securing your business should be at the top of your list. Most of our business security solutions include wireless backup and advanced Web integration systems, tailored to your specific protection needs by Beyond The Studs.

Protecting your expensive inventory and equipment from misuse, theft and environmental dangers is easy with control systems designed to keep up with your ever changing business needs. No matter how small you start or how large you grow, Beyond The Studs expandable business security systems are designed with integration and flexibility in mind. Solutions include access control, surveillance, environmental monitoring such as fire protection, intercoms, intrusion detection, virtual security guard tours, and more.

Beyond The Studs gives business owners and security directors the ultimate in flexibility: full-system access through a secure broadband connection, to inform you if your system is accessed, the status is changed or sensors are triggered. Monitor cameras from your desktop or mobile device. Keep an eye on your investment from wherever you are. We believe your security solutions should help grow your business as well as protect it.

CCTV/Video surveillance is the most important building block of any good security system. Now, you can manage your business security from virtually any place, anytime. We will help you choose from our full line of CCTV/video surveillance equipment and services and design a solution customized to meet your specific needs—and plan for the future as well. We offer a full line of:

- **Security Cameras**
 - Closed-circuit television cameras and lenses (size and type)
 - Specialty cameras, such as infrared, low-light and night vision cameras.
- **Digital Recorders**
 - From a single, one-channel, man-portable unit for covert surveillance, or for a facility-wide distributed enterprise system.
- **Monitors**
 - Beyond The Studs offers a full line of monitor types, sizes, resolutions and formats which include LCD, flat panel and touch-screen capabilities.
- **Remote Viewing**
 - Select your method for remote viewing. We offer IP-based cameras to web-based browser software.
- **Touch-Screen Systems**
 - Intuitive, fast and flexible—from 17 inches to 42 inches
- **Networked Video Solutions**
